EXPERIENCE

InvolveMINT Inc. — Design Manager

Oct 2025 – Present

Hybrid, Develop For Good

- Leading a cross-functional team of 6 designers and product contributors to architect a new end-to-end communication system for involveMINT's mutual-credit marketplace, establishing clear prioritization and integrated campaign strategy across channels.
- Redesigned inquiry, response, and negotiation flows using Figma, Salesforce-informed prototypes, and structured UX templates for 100+ active small businesses on the platform, ensuring segment-specific messaging and tiered treatment.
- Collaborated with product and engineering teams to remove friction in the discovery-to-deal pipeline, projected to increase transaction conversion rates from ~35% to over 60%, directly impacting 2,500–10,000 community members and demonstrating measurable pipeline contribution.

Rowan University Housing Department — Housing Preparation Assistant (HPA)

May 2025 – Sept 2025

Glassboro, New Jersey

- Assisted in preparing 500+ residential units for incoming students by managing room assignments and verifying occupancy data using internal housing management systems, operationalizing account and data management workflows.
- Identified and corrected 100+ database inconsistencies, improving the accuracy of housing reports and reducing last-minute room change requests by 35%, demonstrating data-driven optimization and measurement discipline.

PROJECTS

SkillSwap – Community Works for All — Full-Stack Developer

Nov 2024 – Dec 2024

- Spearheaded a hyper-local webapp using the MERN stack to help communities share skills, services, and help, architecting an integrated platform that connected multiple user segments and channels.
- Gained 50+ active users from university by presenting at campus Hackathon and student-led showcases, demonstrating ability to build cross-functional partnerships and drive segment-specific engagement.
- Launched a crypto alt-token \$EAGLES as a form of currency amongst members, operationalizing a tiered incentive structure for community participation.

Lyra – AI-Powered Music Discovery — Full-Stack Developer

Jun 2025 – Jul 2025

- Built a full-stack music recommendation platform using React.js, Node.js, Salesforce-integrated data models, MongoDB, and GPT-4, allowing users to describe feelings and receive curated YouTube song recommendations through integrated, multi-touch campaigns.
- Delivered 2,000+ personalized song suggestions to early users in the first week of beta, with average session durations exceeding 4.5 minutes, demonstrating measurable engagement and funnel conversion metrics.

ACTIVITIES & LEADERSHIP

SkillSwap — Temple University — Team Lead

September 2025

Glassboro, New Jersey

- Awarded 3rd place in OwlHacks at Temple University for SkillSwap in the Philly Local Innovation track, recognized for its impact-driven approach to community skill sharing.

Pahal (Non-Profit Organization), LPU — Secretary

Mar 2023 – Aug 2023

Punjab, India

- Organized community outreach programs and initiatives for a student-led NGO at LPU.
